3. Practising inclusive education

3.5 Accessing physical education
Why it is important to make PE inclusive for all and how can this toolkit help you?

The involvement of children and young people with a spinal cord injury in physical education and school sport is often one of the biggest hurdles to their inclusion in schools. It is, therefore, a particularly important area to focus on in preparing for and ensuring a student’s welcome back to school. **This toolkit can support you to be an outstanding teacher.** Listed below are strategies, resources and information on how to support inclusion in the gym and on the fields. Ofsted considers inclusion to be a key element of an outstanding school and outstanding teaching:

**Schools cannot be judged as ‘outstanding’ for overall effectiveness unless they have ‘outstanding’ teaching.** Part of the descriptor for outstanding teaching includes: *almost all pupils currently on roll in the school, including disabled pupils, those who have special educational needs and those for whom the pupil premium provides support, are making rapid and sustained progress* (School Inspection Handbook, Ofsted, January 2013)

*When evaluating the quality of teaching in the school, inspectors will consider the extent to which teaching strategies, including setting appropriate homework, together with support and intervention, match individual needs.* (The Framework for School Inspection, January 2013)

In the Framework, Ofsted also considers:

*The extent to which the education provided by the school meets the needs of the range of pupils at the school, and in particular the needs of disabled pupils and those who have special educational needs*

*The extent to which schools provide an inclusion environment which meets the needs of all pupils, irrespective of age, disability, gender reassignment, race, religion or belief, sex, or sexual orientation*

*How well disabled pupils and those who have special educational needs have achieved since joining the school*

---

**Young people’s Top 15 tips for a teacher to make a big difference to a spinal cord injured young person’s PE experience**

- Ask me what I like to do in PE, both before and after the accident (and ask my parent too). Don’t be afraid to ask me for ideas on how I can be included
- Always make me feel involved and do not leave me left sat on the side-lines, feeling left out or excluded
- Try and do as many activities that I can do as possible - sports that can be adapted, like basketball or table tennis so I can take part just like the other pupils
- Do a normal PE lesson, but always adapt it so I can take part. Do it in such a way that it is not obvious and everyone in the class gets something out of it
- If you are doing a team sport or are working in a group make me a captain
- Be adventurous with your adaptations to an activity
- As my PE teacher, to talk to the school about what they can put in place to support me
My PE teacher made me do everything – they adapted everything. I’m not into sport – I didn’t have a choice! My teacher adapted it all so I had to take part. She was quite strict so she didn’t want me sitting on the side and not taking part.

Julie, aged 18*

In PE if they were doing stretches, they would stretch my arms... and on the field we do team games like rounders and relay racing... and cricket. I use a tennis racket because it’s easy to use – that helps.

David, aged 12*

My physiotherapist would often come into school, one week it was during a PE lesson. I suggested incorporating my physiotherapy sessions with the PE lesson. The physiotherapist sent a monthly fitness programme to the school, which linked to the PE curriculum and I got updated on my progress. When the physiotherapist couldn’t come to the lesson, friends, other students and PE support staff would help me with the exercises, which I really liked. I preferred to do some of the lesson separately in the gym on my own for privacy, but other people may have preferred to have it incorporated into the lesson, that’s why it is so important to ask the person involved. I was getting exercise, doing physical activity, still doing the curriculum and it was helping me with rehab too, it was a great option for me.

Ben Cook, aged 18

My child’s school do not make an issue of his disability, they make adaptions so he can get involved in everything. A recent topic was dance. My child had exactly the same moves as his classmates, they made no exceptions. This is the most important thing, to allow the child to be the same as all their peers.

mother of child aged 9

What can you do to make your sessions more inclusive?

- Do floor activities where everyone is on the same level as I am
- Do swimming pool games (this is good exercise for me)
- Think about the PE class coming to my local fitness suite with me
- Get able bodied children to play in chairs if possible (e.g. wheelchair basket ball) or get a local sports club to come in and do demonstrations or Back Up to speak to the school
- If I don’t want to get involved in the main activity, get me involved in other ways (e.g. scoring, refereeing, and setting up coaching drills) but don’t offer this as the only solution, include me as much as possible so I am equal to my peers
- Explore the possibility of having my physiotherapist involved in the planning of the PE lesson
- Make sure the other children are understanding about what I can and can’t do
- Don’t be afraid to try, if it doesn’t work we’ll do it differently next time
Top 6 inclusion strategies for teachers

Supporting all children and young people to participate in PE or sport is reliant upon high-quality teaching and coaching and skills that teachers and coaches already practice.

The following ideas can help you in how to include all children and young people:

1. **Speak to the young person first.** Find out how they feel about taking part in PE and what they want to do. Include them in the planning of the lessons.

2. **Inclusion Spectrum and STEP principles.** Any activity can be adapted and modified using the Inclusion Spectrum and STEP tools. The Inclusion Spectrum is an activity-centred approach to the inclusion of young people of all abilities in physical activity. Inclusion can be achieved by changing the way in which the activity is presented. The Inclusion Spectrum provides physical activity/sport coordinators with different methods of supporting inclusion. By delivering activities differently we can balance different needs within the group and so help to maximise the potential of all young people. The **STEP principles** (Space, Task, Equipment and People) can be used to support the Inclusion Spectrum ‘Change to Include’ approach. Changes in the way the activity is delivered can be made in one or more of the STEP areas. Download the [Sainsbury’s inclusive resource pack](#) for information on the Inclusion Spectrum and STEP principles.

“Inclusive coaching sessions are actually about the expert experience of a coach to know how to adapt a session to include disabled children. Inclusion requires a lot of creativity in the coach because each child is different and unique, regardless of whether or not they have a spinal cord injury. It’s not something that is written in black and white. Knowing how to adapt an activity is where coaching skills come in.”

George Timotheou, Sports Development Manager, Aspire
### E stands for EQUIPMENT

- Size - a larger ball is easier to hit and to receive
- Size - can you make the length of a handle shorter/longer on a racket / bat?
- Size – can you reduce the height of targets? e.g. lower badminton net
- Is there sport specific specialist equipment? e.g. wheelchair football attachment
- Does the wheelchair have anti-tip fitted?

### T stands for TASK

- Demonstrations/Communication – ease understanding
- Adapt rules for the whole group or for individuals
- Adapt the task for some young people so that they can use adapted equipment
- Adapt a game to use zones so everyone can play
- Choose a sport/tasks that is accessible to all e.g. Avoid high jump or run parallel with another accessible activity.
- Rule changes:
  - Tennis- two bounces
  - Basketball- two touches of wheels before having to bounce ball
  - Table tennis- Other player plays seated

### S stands for SPACE

- What is the effect of the size of play area chosen?
- Can you change surface so it is suitable for a wheelchair?
- Is the facility accessible including toilets and changing rooms?
- Decrease targets and distances to make things easier
- Working in zones enables people of similar ability to be matched
- Is there room to move around?
- Can you use a tackle free zone?
Examples of applying the STEP principle:

**Orienteering**
-S: Create a course that does not include grass or extremely uneven surfaces, ensure than the overall distance of course is appropriate  
-T: Remains unchanged  
-E: Ensure than all punches are at an accessible height and location  
-P: Can you put participants in pairs, can support with gradients if required

**Tennis**
-S: Reduce size of court to ensure more opportunities to practice various shots  
-T: Two bounces before ball has to be returned  
-E: Remains unchanged  
-P: Remains unchanged

**Football**
-S: A tackle free zone eg. A wing  
-T: Remains unchanged  
-E: Wheelchair football attachment for front of chair  
-P: Remains unchanged

STEP information has kindly been provided by WheelPower - British Wheelchair Sport. For further information please contact them via info@wheelpower.org.uk or 01296 395995.
3. Training for PE teachers

Consider specialist courses for teaching PE for young disabled people, though consider if the course also covers teaching and adapting activities in mainstream schools rather than focusing on teaching in special schools.

- The Sainsbury’s Active Kids for All training is designed to help teachers to embed inclusive practice in their planning, delivery and assessment within the PE curriculum. Providing teachers with a clearer understanding of the needs of all pupils and to be able to use teaching strategies to ensure all pupils are engaged and make good progress, both of which are essential in outstanding teaching. To book your free training place visit Sainsbury’s Active Kids for All.

- The Youth Sports Trust initiative, Project Ability supports young disabled pupils to take part in competitive sport. Through a network of 50 lead Project Ability schools in England, each selected for their established expertise in engaging young disabled people, schools can improve the quality, and extend the provision, of physical activity for disabled pupils. To identify and make contact with the lead project ability school in your area click here.

- The Youth Sports Trust TOP Sportsability is a free online resource for schools and offers practical advice to teachers, learning support staff, and other sports practitioners. It consists of video clips and downloadable content showing ideas and strategies around the inclusion of young disabled people in physical activity. Register here for the resource.

- Aspire Coaching 2 Coach is an introduction to coaching and working with disabled people in order to adapt a sports session to meet their needs. Aspire School Sport Inclusion Video shows the support offered by Aspire.

- Wheelchair Dance Sport Association (UK) offers practical dance workshops in schools. They are able to link mainstream and special schools together.

- Link with your local special school, as they may be able to provide advice in adapting sporting activities, support you to run an adapted lesson and provide equipment. Contact the SEN team in your local authority to find your local special schools.

- The NSPCC Safeguarding deaf and disabled children in sport features relevant scenarios that highlight key issues relating to sports and disability, along with expert commentary. The resource includes guidance and information as well as information on a range of disability types and implications for coaching.

4. Specialist equipment and adjustments

These organisations can help with mobility equipment which enable spinal cord injured young people to access PE more confidently and give greater independence at home, at school and at play:

- Adam Millichip Foundation
- Aspire
- Cauldwell Children
- Children Today
- Cash4Kids
- Dan Maskell Trust
- Family Fund
- Get Kids Going
- READY Charity
- Lords Taverners
- Richard Overall Trust
- SF Charity
- Variety Club
- Wheel Appeal
- Whizz Kids
The Directory of Grant Making Trusts is a useful source of charitable trusts, but there is a cost for purchasing a copy. Alternatively, contact your local library which may have copies available.

Examples of specialist equipment includes lower netball nets, a low table tennis table (or a table where the roll bar is removed / further back), balloon balls, larger tennis rackets or those adapted with a special strap and bean bags.

Swimming: If a school has a swimming pool or organising swimming activities, consider suitable changing facilities and use of a hoist for entering and leaving the pool. The temperature of the pool may also need to be increased.

- Guidance on assessing development and progression inclusively can be found on the Youth Sport Trust website [here](#).
- General information on ‘P scales’ for students with Special Educational Needs can be found [here](#).
- The statutory programme of study for PE at Key Stages 3 and 4, and the attainment target level descriptions are accessible [here](#).

5. Identify opportunities for young people with a spinal cord injury to excel in PE and other outdoor activities.

There are a number of organisations and schemes designed to motivate and support disabled young people to participate and develop their athleticism and physical activity. There is an appendix of disability sport organisations at the end of this document.

- The national bodies of disabled people in sport and physical activity work with those in the relevant sectors to provide inclusive opportunities as well as encouraging more disabled people to take part in sport: [English Federation of Disability Sport](#), [Disability Sport Wales](#), [Scottish Disability Sport](#), [Disability Sports Northern Ireland](#).
- [WheelPower - British Wheelchair Sport](#): Pro-active referrals can be made for children and young people to find local disability sports groups and organisations.
- [TOP Sportsability](#) offers young disabled people a progressive sporting pathway with a range of appropriate PE and sporting opportunities, incorporating tailored resources and equipment to their needs.
- [County Sport Partnerships](#) (CSPs) are networks of local agencies committed to working together to increase participation in sport and physical activity. Partners include National Governing Bodies of Sport and their clubs, school sport partnerships, local authorities, sport and leisure facilities, primary care trusts and many other sport and non-sporting organisations. County Sports Partnerships (CSPs) are passionate about getting more children and young people involved in sport. Find your local CSP [here](#).
- [Parasport](#) has been designed to inspire, educate, inform and signpost disabled people, and those interested in disability sport, to high quality opportunities and disability-friendly sports club in your area.
- [DotComUnity](#) is a Social Enterprise which primarily supports people with a learning or physical disability. It is a directory to find sport opportunities in your area.
• **Equal Adventure ‘You Can’ Bursary** is a new and exciting scheme for young adults with disabilities, aged 16 - 24, who wish to go on their first self-supported expedition or scientific fieldwork.

6. Inclusive PE Case Studies

The English Federation of Disability Sports has collated examples of inclusive sport best practice

County Sport Partnership Network has examples of inclusive practice

Children and young people's experiences of PE and sport

A 2008 report of the school lives and experiences of children and young people with spinal cord injuries showed that nearly 2/3 of those interviewed in the study had experienced problems, sidelining or exclusion from PE classes.*

Unsurprisingly, a 2001 Sport England/University of York report also found that in nearly all contexts, participation in sport by disabled young people was lower than for the overall population of young people. Those with a mobility-or self-care-related disability were the least likely to participate in sports, and this lack of involvement was not due to lack of motivation or desire to play; rather it was down to external barriers.

Some of the experiences of exclusion and identified barriers from these two reports included:

• Inaccessibility of sports pitches
• Attitudes and comments from PE teachers
• One student was told he was a ‘hazard’ when playing rugby and was encouraged to do something else.
• Being segregated as a group of disabled people
• One school decided to put all the disabled children in one race on Sports Day, creating a stigmatizing experience
• Activities that are not adequately adapted
• Full exclusion from the subject of PE
• Unsuitability of local sports facilities
• Lack of money to participate in sports outside school

“When they do apparatus, I can’t do that so I feel left out so I do some walking. I remember one time I had to go in my standing frame, and they were doing apparatus, so instead of watching them do PE I had to do school work and felt like I’d been naughty.

Alison, 10”

Resources

Organisations and projects

- **Aspire**: national organisation that supports people with spinal cord injuries:
- **English Federation of Disability Sport** (EFDS) is the national body responsible for developing sport for disabled people in England. They work closely with key partners to develop opportunities and build awareness for disabled people in sport
- **Youth Sport Trust**: Variety of resources and contacts for supporting disabled children in PE
- **Inclusive Fitness Initiative** is a programme supporting the fitness industry to become more inclusive, catering for the needs of disabled and non-disabled people, as well as raising physical activity participation levels
- **WheelPower - British Wheelchair Sport**: promotes equal opportunities in sport for people with physical disabilities
- **Young Officials Project** helps develop opportunities for young people to become sporting officials.

Activities and resources

- **Primary and secondary school sport competition formats**
- **Going back to school: a guide for schools** National Spinal Injuries Centre
- **Inclusive Zone Basketball**, instructions on how to run inclusive basketball game with disabled and non-disabled children
- Different Speeds for Different Needs: How to teach sports to every kid. Book by Gary Barber.
- **Inclusion in Physical Education**: a practical pedagogy lecture for teachers
- **Youth Sports Trust**: assessment and progression support for disabled children and young people
- **Top Sportsability**: offers young disabled people a progressive sporting pathway with a range of appropriate PE and sporting opportunities, incorporating tailored resources and equipment to their needs:
  - **Equal Adventure ‘You Can’ Bursary** is a new and exciting scheme for young adults with disabilities, aged 16 - 24, who wish to go on their first self-supported expedition or scientific fieldwork.
- **PE Central**: US website with information on adapted PE activities
- **Adapted Physical Education National Standards**: US website with good links to adapted PE activities and information
- **International Federation of Adapted Physical Activity**: organisation for individuals and organisations interested in adapted physical activity
- **Disability and Youth Sport** a book on the theory of sport for young disabled people
• Doing Sport Differently – A guide to exercise and fitness for people living with disability or health conditions: RADAR

Reports and research

• Understanding the barriers to participation in sport EFDS
• Young Disabled People and Sport (summary): a Sport England/University of York report on the uptake, motivation, and barriers to participation in sport, as identified by disabled young people

Training

• Aspire’s training: Coaching 2 Coach
• Active Kids for All Inclusive PE training

Please contact send@youthsporttrust.org or federation@efds.co.uk for further information about the Active Kids fo All Inclusive PE training

• Including pupils with SEN and/or disabilities in primary physical education: TDA training toolkit
• Including students with SEN and/or disabilities in secondary physical education: TDA training manual
• The Youth Sports Trust initiative, Project Ability
• Wheelchair Dance Sport Association (UK)
• NSPCC Safeguarding deaf and disabled children in sport
Organisations that deliver disability sports:

- Boccia England
- British Gymnastics
- Wheelchair Dance Sport Association (UK)
- Wheelchair Tennis
- Volley Ball England
- British Disabled Fencing Association
- British Wheelchair Basketball
- Disability Snowsport UK
- Great Britain Wheelchair Rugby
- English Table Tennis Association
- British Rowing
- Riding for the Disabled Association
- Royal Yachting Association (RYA)
- British Disabled Waterski and Wakeboard Association
- The Handcycling Association of the United Kingdom
- British Sledge Hockey Association
- Archery GB
- British Disabled Angling Association
- British Wheelchair Athletic Association
- Disability Target Shooting Great Britain
- British Wheelchair Bowls Association
- British Wheelchair Racing Association
- British Triathlon Federation
- Disability Swimming
- Badminton England
- Badminton Scotland
